👤 PROFILE

2 / 2

I am an aspiring developer who is currently gathering experience, particularly in the field of web development.

I had the opportunity to work in a tech store where I built custom computers to meet the specific needs of customers. During that time, I also studied computer science at the National University of Mongolia for two years. This experience introduced me to computer science and allowed me to hone my coding skills to a higher level.

Throughout my work experience, I have developed strong customer service skills, the ability to work effectively in a team, and the ability to continuously learn and improve my skills. Currently, I am excited to be preparing for Tech Forest and am eager to continue growing as a developer.
